

CLOCK SPRING®

Snap Wrap Repair System

The Fast, Economical Solution for Low Pressure Pipeline Repair

Specifically designed for refineries, terminals and process plants Snap Wrap is an extremely cost-effective permanent repair for low pressure (up to 500 psi) pipelines.

Clock Spring® Snap Wrap is used to repair severe corrosion, scrapes, gouges and other blunt defects that penetrate up to 90% of the wall thickness.

Completed 6" Oxygen Line Repairs in UK Process Plant

- No hot work or welding.
- Your own personnel can be trained to install Snap Wrap.
- No heavy or specialized equipment required.
- Installation can be as quick as 30 minutes.
- Complete cure can be achieved within two hours.
- Future corrosion growth is completely prevented.
- Totally environmentally friendly and benign once installed.
