SAFETY DATA SHEET

Safety Data Sheet according to Regulation (EC) 1907/2006.
Version: 2.0
Revision Date: August 1, 2018
Printed Date: August 1, 2018

SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1. Product identifier:
Product ID: CSC-700/702-B (Part B Epoxy Hardener)
Product Name: High Temperature Contour (Part B Epoxy Resin)

1.2. Relevant identified uses of the substance or mixture and uses advised against
Relevant identified uses:
Uses advised against:

1.3. Details of the supplier of the safety data sheet
Supplier's name: Clock Spring Company L.P.
Address: 621 Lockhaven Drive. Houston, TX 77073
Information phone: 281-590-8491

1.4. Emergency telephone number
Supplier's emergency phone: 800-424-9300 Intl: 703-527-3887
Chemtrec Contract # 5043

SECTION 2: HAZARDS IDENTIFICATION

2.1. Classification of the substance or mixture
Classification according to Regulation (EC) No 1272/2008 (CLP):
- Skin Corrosion - Category 1B
- Serious Eye Damage - Category 1
- Skin Sensitizer - Category 1
- Acute toxicity, Dermal - Category 4
- Acute toxicity, Oral - Category 4
- Aquatic Chronic, Category 3

2.2. Label elements
Labeling according to Regulation (EC) No 1272/2008 (CLP)

Hazard pictograms:

Signal word:
Danger

Hazard statements - Health:
H302+H312 Harmful if swallowed or in contact with skin.
H314 Causes severe skin burns and eye damage.
H317 May cause an allergic skin reaction.

Hazard statements - Physical:
NA

Hazard statements – Environmental:
H411 Toxic to aquatic life with long lasting effects

Precautionary statements:
P260 Do not breathe dust/fume/gas/mist/vapors/spray.
P264 Wash your hands/arms/other body parts in touch with the product thoroughly after handling.
P280 Wear protective gloves/protective clothing/eye protection/face protection.
P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water [or shower].
### SECTION 3. COMPOSITION / INFORMATION ON INGREDIENTS

#### 3.1. Substances
NA

#### 3.2. Mixtures

SECTION 4. FIRST AID MEASURES

4.1. Description of first aid measures

Skin Contact:
Take off immediately all contaminated clothing, shoes and leather goods (e.g. watchbands, belts). Rinse skin with lukewarm, gently flowing water for a duration of 30 minutes or until medical aid is available. Immediately call a POISON CENTER/doctor. Wash contaminated clothing before re-use or discard.

Eye Contact:
Remove source of exposure or move person to fresh air. Rinse eyes cautiously with lukewarm, gently flowing water for several minutes, while holding the eyelids open. Remove contact lenses, if present and easy to do. Continue rinsing for a duration of 30 minutes or until medical aid is available. Take care not to rinse contaminated water into the unaffected eye or onto the face. Immediately call a POISON CENTER/doctor.

Ingestion:
Do not induce vomiting. Give large amounts of water followed by milk if available. Do not give anything to a victim who is drowsy, unconscious, or convulsing. If vomiting occurs spontaneously, keep head below hips to prevent aspiration. Seek medical attention immediately.

Inhalation:
Remove source of exposure or move person to fresh air and keep comfortable for breathing. Call a POISON CENTER or doctor. If breathing has stopped, trained personnel should begin rescue breathing or, if the heart has stopped, immediately start cardiopulmonary resuscitation (CPR) or automated external defibrillation (AED). Immediately call

4.2. Most important symptoms and effects, both acute and delayed
Not available.

4.3 Indication of any immediate medical attention and special treatment needed
Not available.

SECTION 5: FIREFIGHTING MEASURES

5.1. Extinguishing media

Suitable Extinguishing Media:
Dry chemical, foam, carbon dioxide water spray or fog is recommended. Water spray is recommended to cool or protect exposed materials or structures. Carbon dioxide can displace oxygen. Use caution when applying carbon dioxide in confined spaces. Simultaneous use of foam and water on the same surface is to be avoided as water destroys the foam. Sand or earth may be used for small fires only.

Unsuitable Extinguishing Media:
High pressure water jet, Water may cause frothing.

5.2. Special hazards arising from the substance or mixture
Hazardous decomposition products formed under fire conditions.

5.3. Advice for firefighters
Isolate immediate hazard area and keep unauthorized personnel out. Stop spill/release if it can be done safely. Move undamaged containers from immediate hazard area if it can be done safely. Water spray may be useful in minimizing or dispersing vapors and to protect personnel. Water may be ineffective but can be used to cool containers exposed to heat or flame. Caution should be exercised when using water or foam as frothing may occur, especially if sprayed into containers of hot, burning liquid. Dispose of fire debris and contaminated extinguishing water in accordance with official regulations.

Special Protective Actions:
Wear protective pressure self-contained breathing apparatus (SCBA) and full turnout gear.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures

Personal Precautions:
Avoid breathing vapor. Avoid contact with skin, eye or clothing. Do not touch damaged containers or spilled materials unless wearing appropriate protective clothing.

Recommended Equipment:

Emergency Procedure:
Cover the liquid with inert absorbent. Scoop all contaminated material into containers for proper disposal. Flush area with water to remove residues. Isolate hazard area and keep unnecessary people away. Remove all possible sources of ignition in the surrounding area. Notify authorities if any exposure to the general public or the environment occurs or is likely to occur. Do not touch or walk through spilled material.
ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area).

6.2. Environmental precautions
Stop spill/release if it can be done safely. Prevent spilled material from entering sewers, storm drains, other unauthorized drainage systems and natural waterways by using sand, earth, or other appropriate barriers.

6.3. Methods and material for containment and cleaning up
Not specified.

6.4. Reference to other sections
NA

SECTION 7: HANDLING AND STORAGE

7.1. Precautions for safe handling
General:
Wash hands after use.
Do not get in eyes, on skin or on clothing.
Do not breathe vapors or mists.
Use good personal hygiene practices.
Eating, drinking and smoking in work areas is prohibited.
Remove contaminated clothing and protective equipment before entering eating areas.
Eyewash stations and showers should be available in areas where this material is used and stored.

Ventilation Requirements:
Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. If user operations generate dust, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit.

7.2. Conditions for safe storage, including any incompatibilities
Keep container(s) tightly closed and properly labeled. Store in cool, dry, well-ventilated areas away from heat, direct sunlight, strong oxidizers and any incompatibilities. Store in approved containers and protect against physical damage. Keep containers securely sealed when not in use. Indoor storage should meet EN standards and appropriate fire codes. Containers that have been opened must be carefully resealed to prevent leakage. Empty container retain residue and may be dangerous.
Do not cut, drill, grind, weld or perform similar operations on or near containers.
Do not store near acids or epoxy resins. Do not store product in reactive metal containers.
For products supplied in side-by-side cartridges, keep cartridges in a location where they cannot be punctured or ruptured which would expose the catalyst to the resin in an uncontrolled environment.

7.3. Specific end use(s)
See section 13.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1. Control parameters

<table>
<thead>

<td>64-17-5</td>
<td>1000</td>
<td>1910</td>
</tr>
</tbody>
</table>

8.2. Exposure controls
Follow established company guidelines

Appropriate Engineering Controls:
Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value.

Eye Protection:
Wear eye protection with side shields or goggles. Wear indirect-vent, impact and splash resistant goggles when working with liquids. If additional protection is needed for entire face, use in combination with a face shield.

Skin Protection:
Use of gloves approved to relevant standards made from the following materials may provide suitable chemical protection: PVC, neoprene or nitrile rubber gloves. Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact,
chemical resistance of glove material, glove thickness, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Chemical-resistant clothing is recommended to avoid prolonged contact. Avoid unnecessary skin contact. Wear gloves, long sleeved shirt, long pants and other protective clothing as required to minimize skin contact.

**Respiratory Protection:**

If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker, a respiratory protection program that meets or is equivalent to OSHA 29 CFR 1910.134 and ANSI Z88.2 should be followed (European equivalence with EN standards listed under Regulation (EU) 2016/425 on personal protective equipment). Check with respiratory protective equipment suppliers.

Use EN approved organic vapor cartridge respirator when vapor mist exposure is likely.

### SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

#### 9.2. Other information

NA

### SECTION 10: STABILITY AND REACTIVITY

#### 10.1. Reactivity

Not expected.

#### 10.2. Chemical stability

Stable at normal temperature and pressure.

#### 10.3. Possibility of hazardous reactions

Not expected.

#### 10.4. Conditions to avoid

Heat and flames.

#### 10.5. Incompatible materials

Avoid strong oxidizing agents, acids and bases.

#### 10.6. Hazardous decomposition products

Hazardous decomposition products may include oxides of carbon and nitrogen, hydrocarbon fragments and organic decomposition fragments.

### SECTION 11: TOXICOLOGICAL INFORMATION

#### 11.1. Information on toxicological effects

**Acute Toxicity:**

Classified for Acute Toxicity. See section 2.

Data disclosure from ECHA regarding submitted dossiers according to REACH:

CAS 64-17-5 ETHYL ALCOHOL

LC50 (mouse): Approximately 21000 ppm (4-hour exposure); cited as 39 g/m3 (4-hour exposure) (1, unconfirmed)
LD50 (oral, rat): 7060 mg/kg (41); 10600 mg/kg (41); 13660 mg/kg (37)
LD50 (oral, mouse): 3450 mg/kg (1, unconfirmed)
LD50 (oral, guinea pig): 5560 mg/kg (37)

CAS 2855-13-2; 3-aminomethyl-3,5,5-trimethylcyclohexylamine

LC50 (4h): 1.07 – 5.01 mg/L air (rat)
LD50: 1030mg/kg bw (rat), oral route
LD50: 2000 mg/kg bw (rat), dermal route
Repeated-dose toxicity:
NOAEL (rat): 59 – 160 mg/kg bw/day
LOAEL (rat): 160 mg/kg bw/day
CAS 1761-71-3 4,4'-methylenebis(cyclohexylamine)
LD50: 350 – 1000 mg/kg bw (rat), oral route
LD50: 2110 mg/kg bw (rat), dermal route
Repeated-dose toxicity:
NOAEL (rat): 2.5 - 50 mg/kg bw/day

Aspiration Hazard:
No Data Available
Carcinogenicity:
No Data Available
Germ Cell Mutagenicity:
No Data Available
Reproductive Toxicity:
Suspected of damaging fertility or the unborn child
Respiratory/Skin Sensitization:
Inhalation of vapors may cause irritation of the respiratory tract.
May cause an allergic skin reaction
Serious Eye Damage/Irritation:
Corrosive to eyes and may cause severe damage including blindness.
Causes serious eye damage
Skin Corrosion/Irritation:
Causes severe skin burns and eye damage
Specific Target Organ Toxicity - Repeated Exposure:
May cause damage to organs <liver, muscles> through prolonged or repeated exposure.
Specific Target Organ Toxicity - Single Exposure:
No Data Available
Potential Health Effects - Miscellaneous
64-17-5 ETHYL ALCOHOL
The following medical conditions may be aggravated by exposure: liver disease. Tests in some laboratory animals indicate this compound may have embryotoxic activity. Tests in animals demonstrate reproductive toxicity. Ingestion may cause any of the following: stupor (central nervous system depression), gastrointestinal irritation. If absorbed through the skin, may be: harmful.

EC10 (56 days) 228 mg/kg soil dw
EC50 (56 days) 699 mg/kg soil dw
Toxicity to soil microorganisms
NOEC (28 days) 62.5 mg/kg soil dw
EC10 (28 days) 1 g/kg soil dw

12.2. Persistence and degradability
No data available.
12.3. Bioaccumulative potential
No data available.
12.4. Mobility in soil
No data available.
12.5. Results of PBT and vPvB assessment
No data available.
12.6. Other adverse effects
No data available.

SECTION 13: DISPOSAL CONSIDERATIONS

13.1. Waste treatment methods
According to DIRECTIVE 2008/98/EC the waste resulting is classified as H 5/13/14, according to Annex III. Local, national and European waste management legislation for the particular form of containment used must be complied with. It should be noted that final decisions on the appropriate waste management method, in line with regional, national and European legislation, and possible adaptation to local conditions, remains the responsibility of the waste treatment operator. Empty containers retain product residue which may exhibit hazards of material, therefore do not pressurize, cut, glaze, weld or use for any other purpose. Return drums to reclamation centers for proper cleaning and reuse.

SECTION 14: TRANSPORT INFORMATION

14.1. UN number
2922
14.2. UN proper shipping name
Corrosive Liquid, Toxic, N.O.S. (3,3’-dimethyl-4,4’-diaminodicyclohexylmethane)
14.3. Transport hazard class(es)
8 (6.1)
14.4. Packing group
II
14.5. Environmental hazards
Environmentally Hazardous.
14.6. Special precautions for user
TP2
14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code
NA
SECTION 15: REGULATORY INFORMATION

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU REGULATIONS:
- Regulation (EC) 1272/2008 on the classification, labeling and packaging of substances and mixtures (CLP Regulation).
- Directive (EC) 98/2008 on waste
- ADR: European Agreement Concerning the International Carriage of Dangerous Goods by Road

Restrictions of occupation
GESTIS INTERNATIONAL LIMIT VALUES, by IFRA Institut für Arbeitsschutz der Deutschen Gesetzlichen Unfallversicherung.

Information on chemical hazards:
ECHA webpage, brief profile of substances and summary disclosures.

AGENCIES:
ECHA: European Chemicals Agency.

15.2. Chemical safety assessment
NA
